Profile

I'm an industry professional with over 8 years of experience specializing in game and software development across Mobile (iOS/Android), Console (PS4/PS5/Xbox), Desktop and VR.

Professional Experience

02/2026 – present

Lead Unity VR Developer Mobiddiction

- Owned production of new VR experiences for the internal platform Patient VR

05/2025 – 02/2026

Lead Unity C# Developer Trapsoul Games

- Led full client-side MVP development of a beat-em-up title from concept to playable build.
- Architected combat systems, AI behavior trees, character controllers, and physics from scratch.

11/2023 – 05/2025

Senior Unity C# Developer Audiomob

- Owned R&D for Unity and Native (Android & iOS) Ad SDKs; Involved in direct client communication to support SDK integration.
- Maintained CI/CD pipelines; established team code standards and cross-platform SDK architecture.

03/2021 – 11/2023

Lead Unity C# Developer Tritan Technology

- Led client-side development on multiplayer titles such as Metarush Racing and Moonville Farms.
- Managed junior developers, defined technical architecture, and conducted code reviews.

01/2020 – 03/2021

Senior Unity Developer Double Eleven

- Part of the team that ported RimWorld to PS4/PS5 and Xbox - working on gameplay systems and UI for the console release.
- Worked within AAA-adjacent pipeline with strict platform certification requirements.

12/2017 – 01/2020

SDK Unity C# Developer Crazy Labs

- Part of both the prototyping and live-ops teams, shipping titles across hyper-casual and casual.
